

Table of contents

p.	11	Glossary
	17	Review methodology
	19	Introduction
	25	Chapter 1
		<i>The ubiquity and significance of human movement</i>
	1.1.	The disciplines of exercise science and kinesiology: a renaissance of physical culture, 26
	1.2.	The evolution and scope of kinesiology: from physical education to interdisciplinary science of human movement, 28
	1.3.	The science of exercise: enhancing health, performance, and recovery through evidence-based practice, 31
	1.4.	The interplay between exercise science and kinesiology, 38
	1.5.	The three pillars of exercise sciences: experiential learning, scholarly inquiry, and professional practice, 39
	1.6.	Exercise science and professional careers, 43
	1.7.	Beyond the body: holistic perspectives in exercise science, 44
	47	Chapter 2
		<i>The exercise and sport sciences curriculum in Italian landscape</i>
	2.1.	Beyond biomedicine: reintegrating the core disciplines of kinesiology in exercise science education, 48
	2.2.	The evolution of physical education and sports science in Italy: from I.S.E.F. to European-aligned academic structures, 50
	2.3.	The scientific knowledge in the Italian university context, 52

- 2.4. The Italian Ministerial Reform of 2023, 54
- 2.5. L-22: Bachelor's Degree in Exercise and Sport and Sciences, 55
- 2.6. LM-67: Master's Degree in Preventive and Adapted Physical Activity Sciences, 59
- 2.7. LM-68: Master's Degree Program in Sports Science and Techniques, 64
- 2.8. LM-47: Master's Degree Program in Organization and Management of Sports and Physical Activity Services, 68
- 2.9. From tradition to innovation: the evolution and challenges of academic structuring in exercise and sport sciences, 70
- 2.10. Towards a coherent and structured core curriculum in exercise and sport sciences, 83

p. 87 Chapter 3

Redefining kinesiology and sport sciences in Italy. Bridging educational reform, scientific identity, and epistemological clarity

- 3.1. The 2021 sport reform and the rise of the kinesiologist profession, 88
- 3.2. Scientific identity and epistemological challenges in kinesiology and sport sciences, 94
- 3.3. Persistent disciplinary overlaps and the need for autonomy, 100
- 3.4. Toward a unified framework: lessons from international standards, 106
- 3.5. Forging a cohesive future for KSS in Italy, 113

119 Chapter 4

The exercise professional in focus. A comparative analysis of role clarity and legislative frameworks in Italy and beyond

- 4.1. Legitimizing movement: Toward a coherent professional identity for the exercise specialist in global and Italian contexts, 119
- 4.2. The global ambiguity of the exercise professionals, 121
- 4.3. The Italian model: legislative clarity and the kinesiologist, 126

- 4.4. Comparative analysis: Italy vs. global perspectives, 133
- 4.5. Toward a unified yet contextual framework, 139
- 4.6. Conclusion, 143

p. 145 Chapter 5
The global convergence of exercise science curricula and its impact on professional practice

- 5.1. Reclaiming the foundations of exercise science: the case for a broader and more integrated curriculum, 146
- 5.2. The restricted scope of exercise science education, 148
- 5.3. The perils of excessive specialization in exercise science, 153
- 5.4. The paradox of exercise science: a discipline in search of distinction, 155
- 5.5. Insufficient evidence and the gap between theory and practice, 159
- 5.6. The advantages of a multidisciplinary approach in exercise science, 163
- 5.7. From theory to practice: advancing exercise science education through interdisciplinary learning, 170

175 Chapter 6
University teaching in exercise and sport sciences. Knowledge, skills, and abilities

- 6.1. Educating the modern kinesiologist: integrating knowledge, skills, and competencies in exercise and sport sciences, 175
- 6.2. Theoretical knowledge in exercise sciences, 177
- 6.3. Skills, 180
- 6.4. Cross-disciplinary and professional abilities, 185
- 6.5. Teaching methods for the development of transversal abilities, 186
- 6.6. Alignment with the job market, 188
- 6.7. Future perspectives, 188
- 6.8. Conclusions, 189

p. 191	Chapter 7
	<i>Physical activity through the ages. A journey from biomedical beginnings to a global imperative</i>
	7.1. Historical developments in physical activity, 192
	7.2. Current approaches to physical activity, 194
	7.3. Future directions for physical activity, 199
	7.4. Conclusions, 203
207	Chapter 8
	<i>Advancing exercise science through evidence-based practice. Bridging research, education, and application</i>
	8.1. Closing the gap: from research to real-world application, 208
	8.2. Evidence-based practice: foundations and challenges, 210
	8.3. Bridging the gap: collaboration and accessibility, 212
	8.4. Building expertise through education, 214
	8.5. Revolutionizing EBP with artificial intelligence and slow science, 216
	8.6. Evidence-based programs: proven strategies in action, 218
	8.7. The future of exercise science: integration and innovation, 220
	8.8. Conclusions, 222
225	Chapter 9
	<i>From analysis to action. Practical applications and guidelines in kinesiology and sport sciences</i>
	9.1. Synthesising the kinesiologist's role: a framework for application (Italian context), 225
	9.2. Bridging theory and practice: key principles for action, 227
	9.3. Illustrative scenarios: principles in practice, 228
	9.4. Implications for education and training, 230
	9.5. Conclusion: advancing KSS through action, 231
